## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statements filed 8-14-2002, 9-24-2002, and 12-19-2002 have been considered.

### ***Claim Rejections - 35 USC § 103***

2. The indicated allowability of claims 51-52 is withdrawn in view of the newly discovered reference(s) to Seii. Rejections based on the newly cited reference(s) follow.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
5. Claims 51-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seii in view of Kisu. Seii teaches a charging roller facing a surface of the body to be

Art Unit: 2852

charged, said charging roller comprising a metallic core including axially opposite end portions larger in diameter than the other portion, an elastic member provided on said core having the same outside diameter. Seii does not teach films wrapped around the elastic member corresponding to said opposite ends portions of said core.

Kisu teaches films wrapped around the elastic member corresponding to said opposite ends portions of said core. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching of Kisu with the charging member of Seii to properly position the charging member with respect to the photosensitive member.

#### ***Allowable Subject Matter***

6. Claims 1-50 are allowed.

#### ***Specification***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kaname et al. teaches a charging roller having a shaft that is wider at the ends.

#### ***Conclusion***
